PROPERTIES

of operations

Commutative	Associative	Distributive	Zero	Identity
We can swap numbers and change the order, but the product stays the same.	It doesn't matter how we group the numbers. The product stays the same.	You can multiply a sum by multiplying each addend separately and then add the products.	When we multiply any number by zero the product is always zero.	Any time you multiply a number by one, the product is the original number.
$2 \times 3 = 3 \times 2$	$2 \times (3 \times 4) = (2 \times 3) \times 4$	$2 \times (3 + 4) = 2 \times 3 + 2 \times 4$	$6 \times 0 = 0$ (OR) $0 \times 6 = 0$	$9 \times 1 = 9$ (OR) $1 \times 9 = 9$
